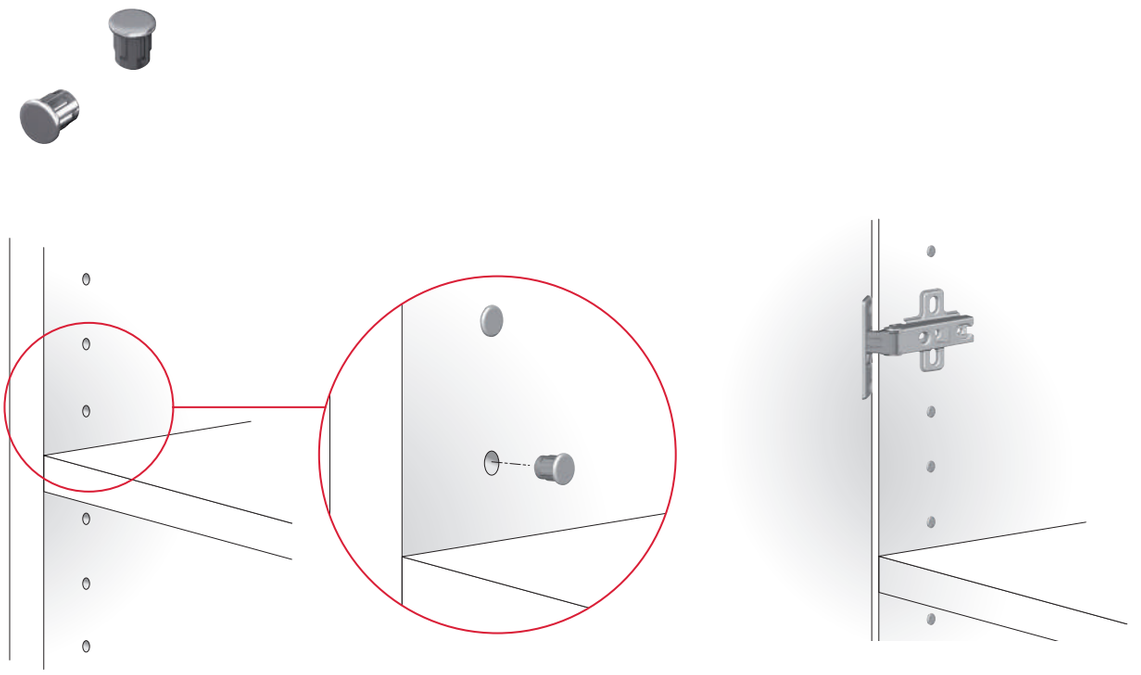
NIKO

COVER CAPS

R 1

inc.Vat

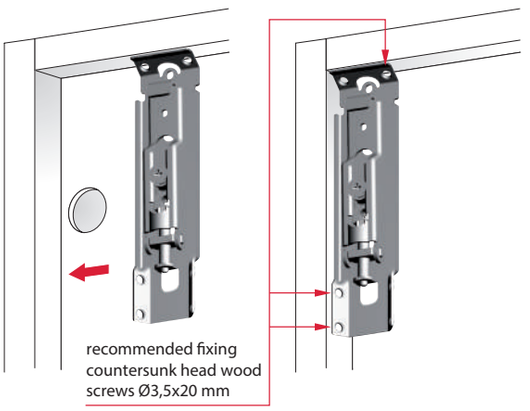
Cover Cap in Iron and nickel plated, an essential detail to add that extra touch to your exclusive furniture.
To be simply inserted onto any Ø 5 mm hole, making the aesthetics of your furniture more innovative and captivating.
is sheer ELEGANCE.



APC 1

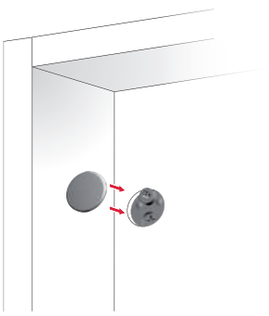
APC1 is a two-handed invisible screw fixing cabinet hanger requiring a simple installation, without any pre-drilling operations.
It can be installed on cabinets with a minimum sanitary gap of 16 mm.
Independent Vertical and In-Depth adjustment to easily and quickly align the cabinet against the wall.
The adjustments can be carried out from the inside of the cabinet through a hole covered through a round cover caps.
Capacity loading 65 Kilos per piece (130 Kilos per pair).
In accordance with the European Regulation UNI EN 15939.

INSTALLATION UNDER THE CABINET TOP

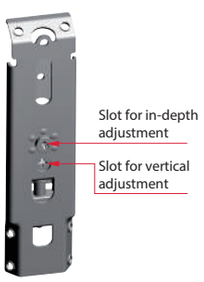


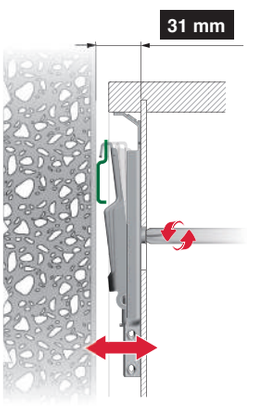
INSTALLATION ON THE WALL

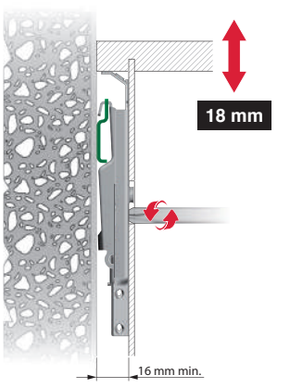
COVER CAP INSERTING



ADJUSTMENTS







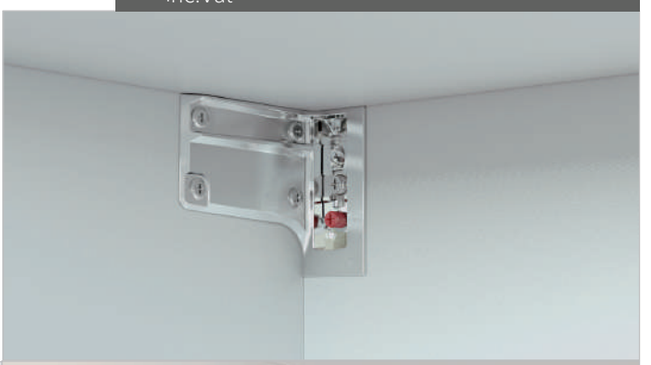
LIBRA H7

Optional alu bars for extra hanging points

R 228
per cupboard
inc.Vat

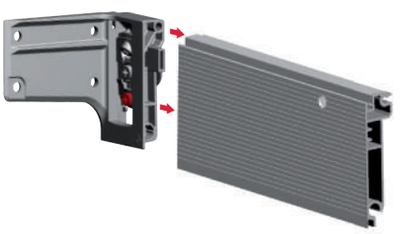
Conceived for suspended base units.
Excellent load capacity, 3D adjustments, and cover caps to make it discreet.
Optional aluminium bars for even better capacity loading and stability.
Comes with in built anti-turnover lock.

*MAXIMUM : 600 DEEP + DRAWERS.
*NO HEIGHT RESTRICTION.



LIBRA H7 SCREW FIXING WITH "PEG JOINT"

LIBRA H7 SCREW FIXING WITH "PEG JOINT" WITH ALU BAR H 80,5 mm

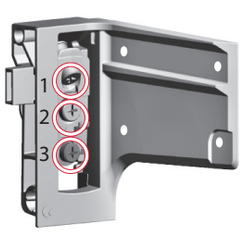


LIBRA WP5

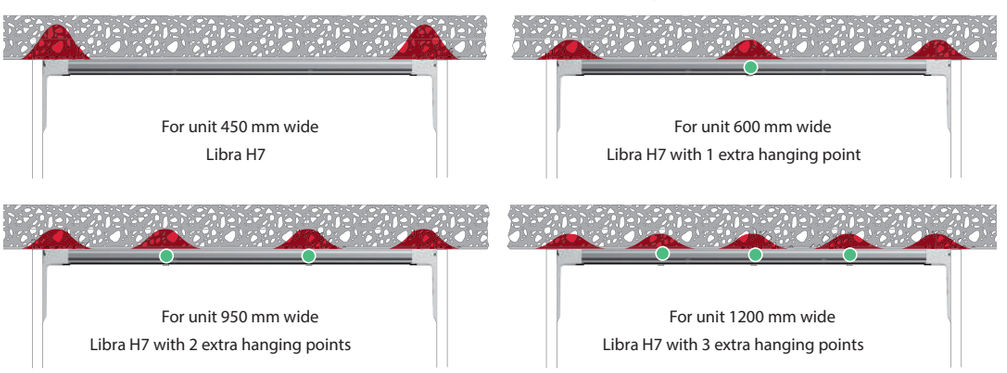
= STRESS INTENSITY LEVEL ON THE WALL

=

By adding extra hanging points on the aluminium bar, the capacity loading is more evenly distributed, thus sensibly reducing the stress intensity level on the wall.



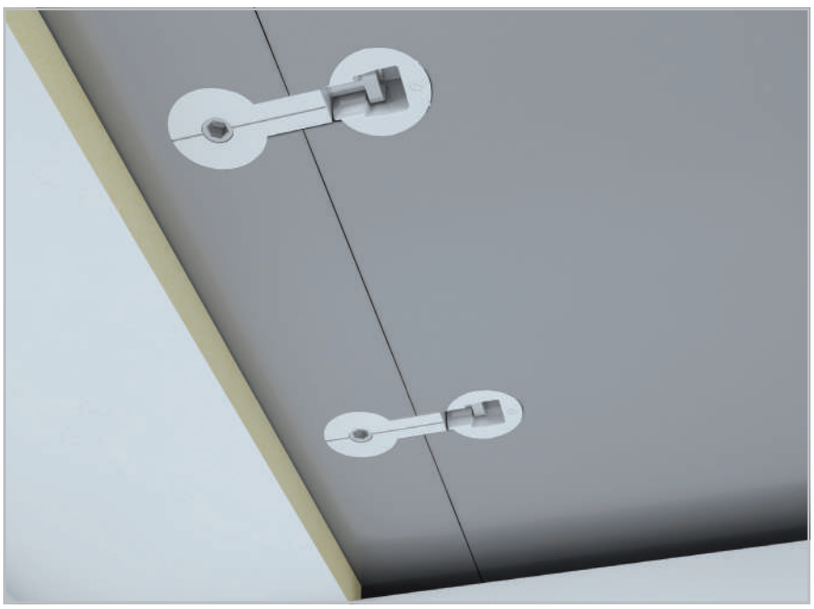
1 VERTICAL 13 mm
2 IN DEPTH 12 mm
3 ANTI-TURNOVER LOCKING



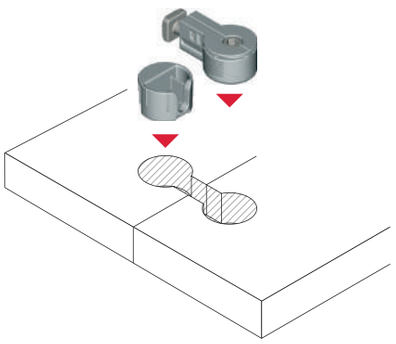
QUICK

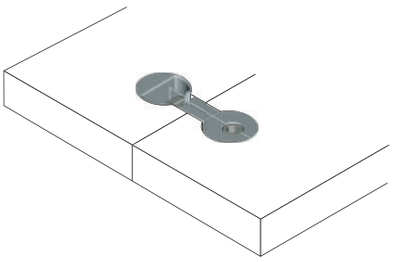
Worktop connector Ø35 L. 150 mm

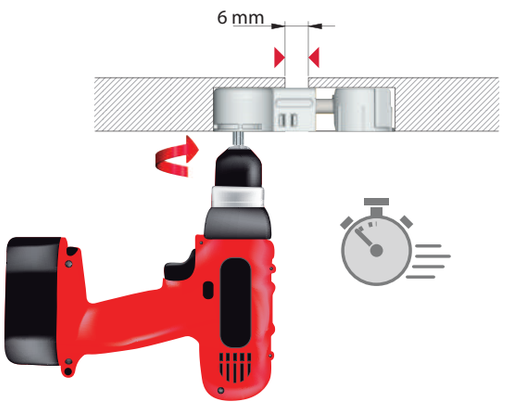
Conceived to horizontally join two worktops or panels together minimum 25 mm thick.
Fast and easy installation as the two elements don't fall when inserted into the related housings.
Tightening steel dowel 150 mm long.
Fastening travel 6 mm.



INSTALLATION AND CONNECTION



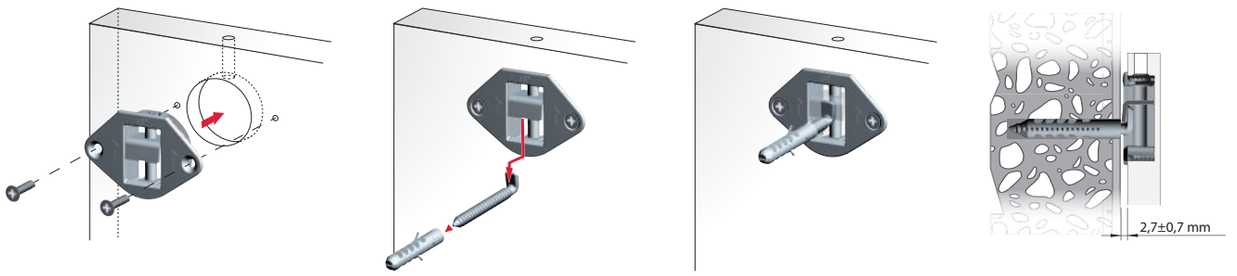




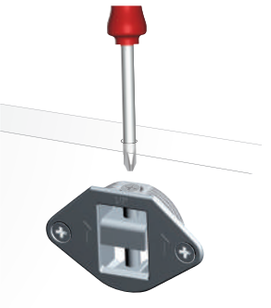
CONCEALED HANGER

Ideal for fixing mirror panels
A through hole in the top edge, allows to align brackets vertically.
Lateral adjustment which allows user-friendly fixing in place of mirrors and panels
Capacity loading 80 Kilos per pair.

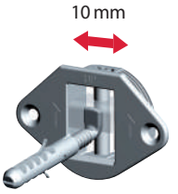
INSTALLATION ON THE REAR PANEL AND ON THE WALL



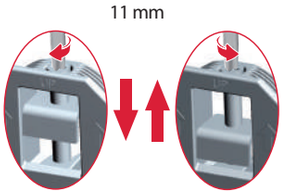
ADJUSTMENTS



LATERAL ADJUSTMENT



VERTICAL ADJUSTMENT

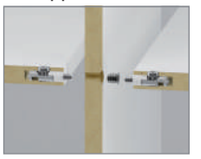


WARDROBE FLAT PACK

TARGET

Application A

Application A1



PK2 - Easy shelf repositioning

Application B

Application B1

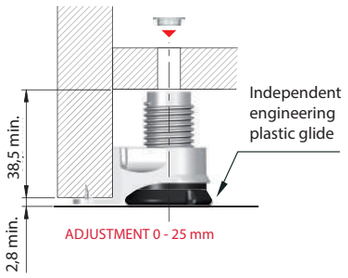
INTEGRATO A h 25 mm - Skirting clip and dowel

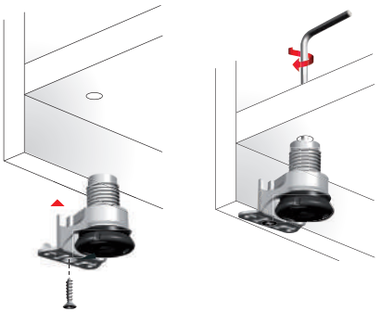
Application C

APPLICATION C

INTEGRATO

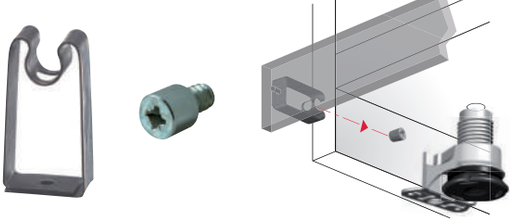
Suitable to align heavy duty wardrobes, bookcases and modular furniture. Leveller with 25 mm height adjustment and 175 kgs load capacity with in-built glide that prevents floor scratching. Adjustment to be **carried out through Ø8 mm hole in the furniture bottom by using a S6 mm allen wrench or both cross and blade screwdriver.**





SKIRTING CLIP AND DOWEL

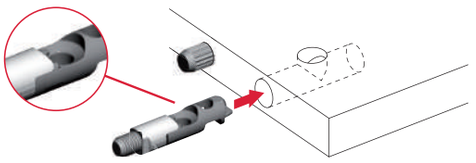
Harmonic steel clip to be fixed to the plinth with a screw and steel dowel Ø 10 mm **with Ø 5 mm wood thread screwed onto the side panel. Plinth clip is horizontally pressed and clicks onto the steel dowel.**
Extremely fast and stable installation.

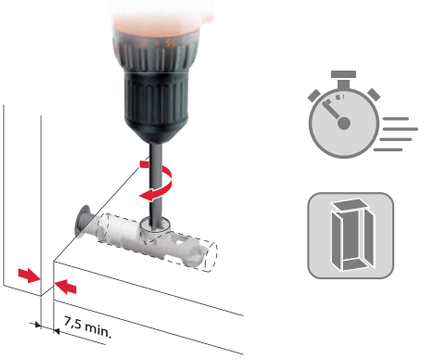


APPLICATION A - A1

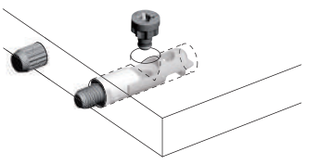
TARGET

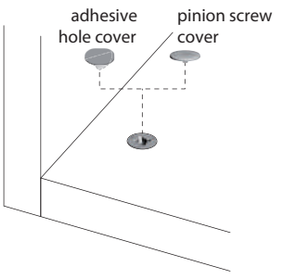
Strong and easy solution for connecting cabinet bottoms and tops with worm gear mechanism.
Small 10 mm diameter makes it aesthetically minimalistic.
It can be pre-assembled in the panels and fixed at site in minutes.

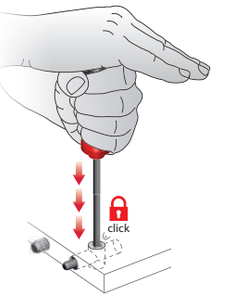


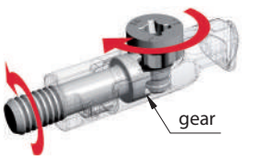


Place the pinion screw from above.



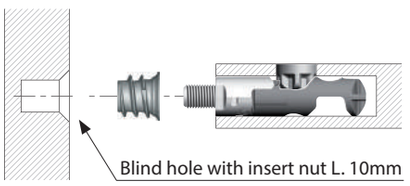




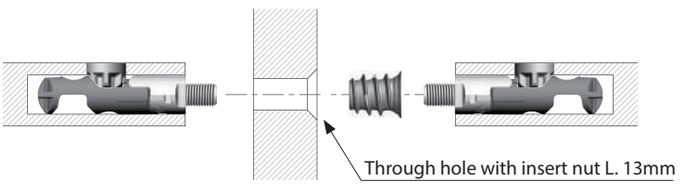


By turning the pinion screw, the threaded dowel makes a synchronized rotation.

APPLICATION FOR END PANEL
16 mm THICK



APPLICATION FOR INTERNAL PARTITION
16 mm THICK

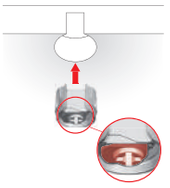


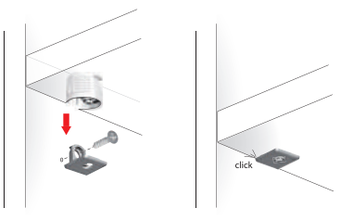
APPLICATION B - B1

PK2

Join any shelf and side by rotating in-built minifix 90° to obtain a click for lock position.
Easy shelf repositioning by reversing the operation. Side bracket with pre-inserted spreading bush and screw for shelf repositioning without damaging the hole. Ideal also to join short partitions inside the wardrobe.

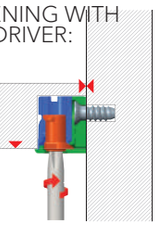
INSTALLATION





STRUCTURAL FASTENING WITH CROSS PZ2 SCREWDRIVER:

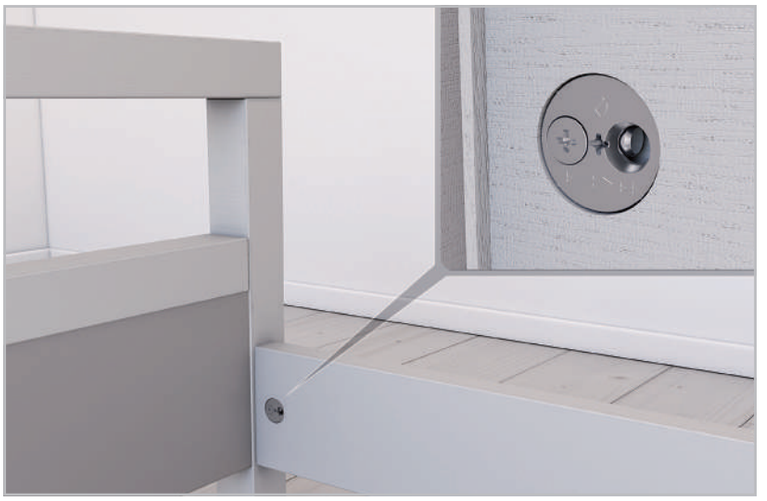
90° turning from the lower side, for the shelves and for the top.



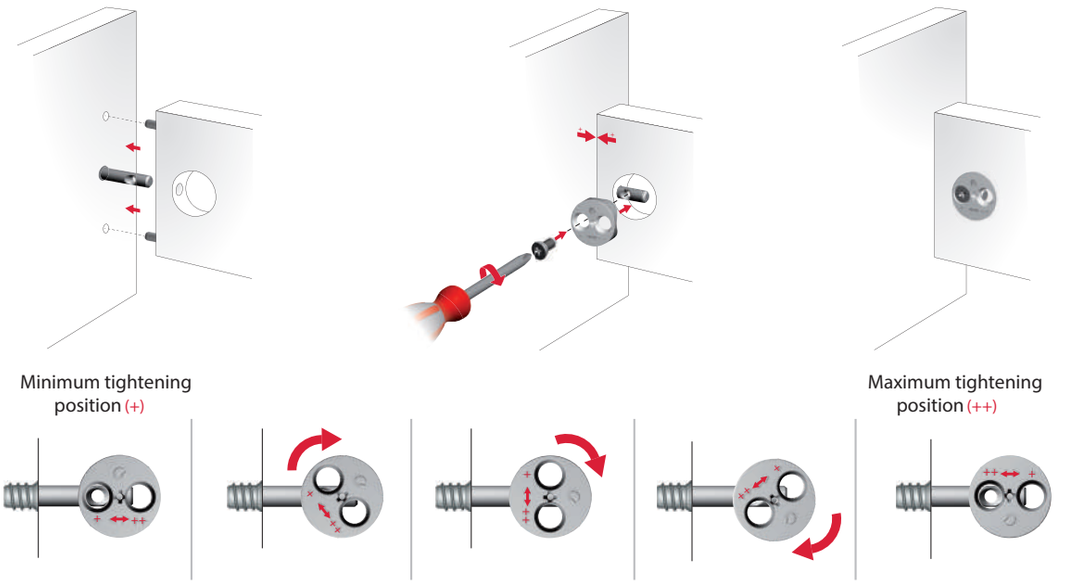
VIS

Bed flat - pack

Especially conceived to join bed sides and panels.
It boasts two different tightening positions, standard + and strong ++, which helps in case of inaccurate drillings,
or for refreshing the tightening, without dismounting the whole structure.

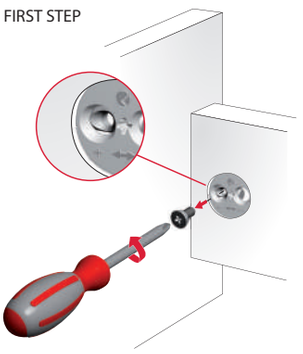


INSTALLATION AND ASSEMBLING

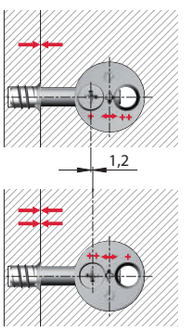


FROM + (minimum)
TO ++ (maximum) TIGHTENING

FIRST STEP

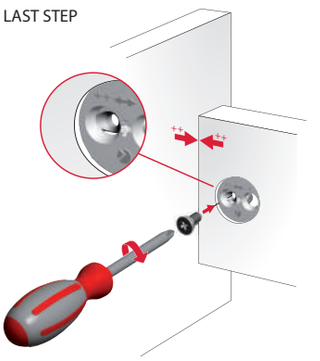


Minimum tightening position (+)



Maximum tightening position
(++) = + 1,2 mm

LAST STEP



NON-SLIP MATS

In light grey colour for doors and drawers.
Latest design in wave finish.

- 580 x 1,2 mm thickness - for Base / TU / GC / ELO Units

R 193
inc.Vat

KIARO OPENING SYSTEM
with aluminium profile

KIARO is an opening system for drop down doors with a concealed mechanism which allows to adjust the settings depending on door weight and dimension, thus enabling to manage a wide range of doors with only one reference. As it is a two-handed mechanism, it can be installed both on right and left side. A high resistance technical wire grants a significant loading capacity together with minimal shapes and elegant design. Available in two finishes which respond to the current overriding trends in the furniture appliances industry. It is conceived also to be installed with integrated led lighting.

A talented all-rounder with many qualities TopLine L

Sliding doors leave no margin of doubt when it comes to practical functionality and y. Supreme user friendliness and individually tailored design versatility make them the ideal answer to the demands of modern living. The TopLine

these demands with perfection – from ease of installation to convenience of use.

Combination with the Silent System Flexible 50 and 80 gently closing systems provides added convenience. This way, even heavy, large doors reliably close with a mere whisper. That's advanced technology from Hettich.

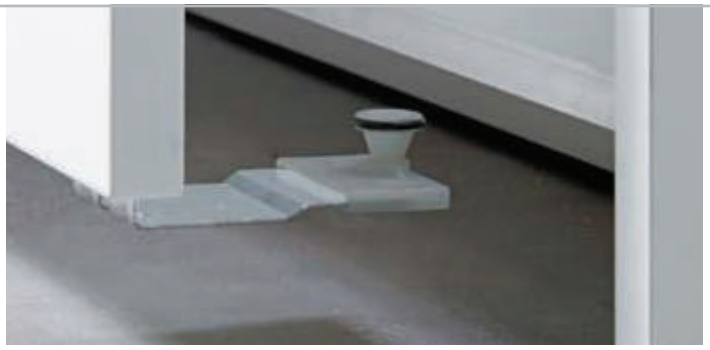
The easy-to-install sliding door system with integrated height adjustment feature TopLine L

Suitable for use with door thicknesses ranging from 16 to 40 mm, TopLine L easily meets the modern-day wish for individuality and ultimate flexibility.

The same running and guiding components can be used for solid and aluminium-framed fronts. TopLine L provides an astonishing range of options for selecting aluminium door frame profiles. The multitalented fitting among sliding door hardware ensures unrestricted use from a frame width of just 50 mm.

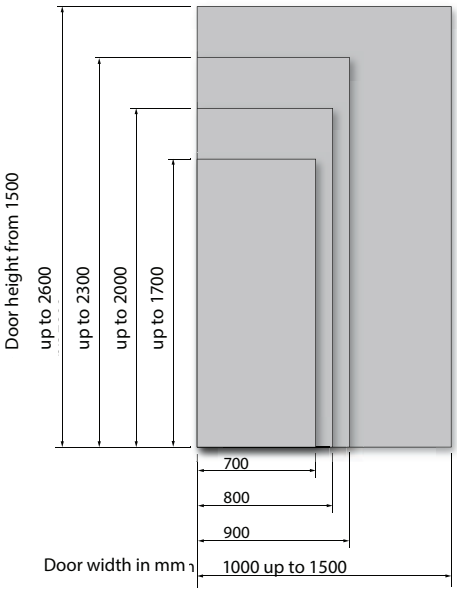
The doors are simply placed onto the running profile. Quick-mounting guiding components guarantee the greatest possible convenience right from the word go. The guides simply clip into the bottom guiding profile. Height is conveniently adjusted with the doorsin place without having to undo the fixing screwson the runners. This also makes child's play of positioning doors for neat gap alignment.

Perfected design to excite, lasting quality and impressive user friendliness: TopLine L sets new standards for tomorrow's furniture.



Technical details in brief

- 2-track, top-running sliding door fitting
- Overlay door position
- Door weight up to 50 kg
- Door height up to 2600 mm
- Door width 700 mm - 1500 mm
- Door thickness
  16, 18, 19, 21, 22, 25, 40 mm
- Height adjustment ± 3 mm
- Rack plated running components
- 2 opening options:
  completely flush or offset when using projecting handles
- Quick-mounting guiding components



Optimum sliding door performance is determined by door width, height and weight.
TopLine L meets the Hettich quality standard, based on EN 15706, within the marked height/width ratio. In the door-closing test described in this standard, the door is accelerated with a tensile load of 4 kg and is required to withstand a defined number of closing cycles. Maximum door weight is 50 kg.

Sliding door system TopLine L
Quality that meets all of demands

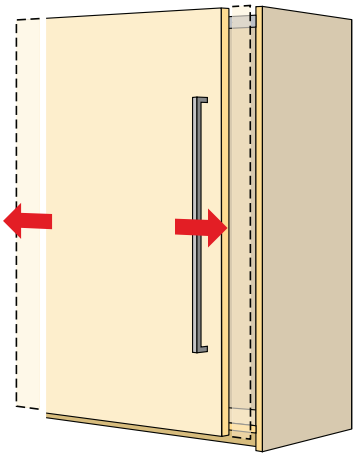
The TopLine L sliding door system is constantly monitored for quality. The varying quality standards demanded by different markets and segments are each taken into account. The diagrams below show examples of some of the testing processes and what they involve.

Quality criteria

- Endurance test over 40,000 cycles
- Closing test with a tensile load of 4 kg
- Lift-out test with 250 N
- Load test in horizontal direction with 250 N

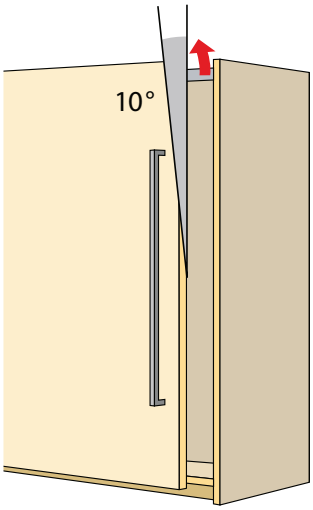
Endurance test

The door is required to withstand a specific number of opening and closing cycles at a defined speed.



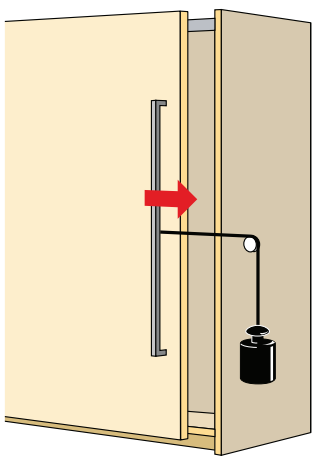
Lift-out guard

The door is pulled up and forwards at an angle with a defined force and must neither come off or fall out of the cabinet.



Closing test

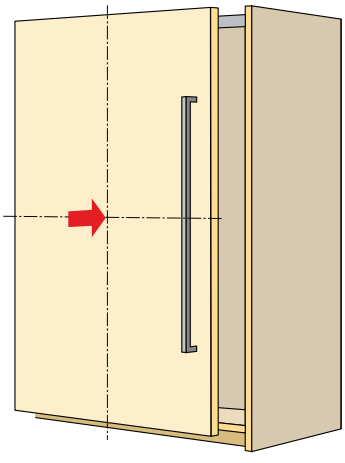
The door is required to withstand a specific number of closing cycles performed under a defined tensile load.



Test to DIN EN 15706

Horizontal safety test

Pressure is applied to the middle of the door with a defined force. The door must neither come off or fall out of the cabinet.



Wing Line 770

- Suitable for use throughout the home
- Door weight max 20kg per door panel
- Door height max 2200mm
- Door panel width max 500mm
- For use with wood and wood framed doors

With Wing Line 770 doors fold open and shut at a touch. The super soft & safe door action is appreciated especially in bedrooms.

Sliding door system for modern furniture design: SlideLine M

R4 454 inc.VAT

Mechanism only

Slide it. Love it.

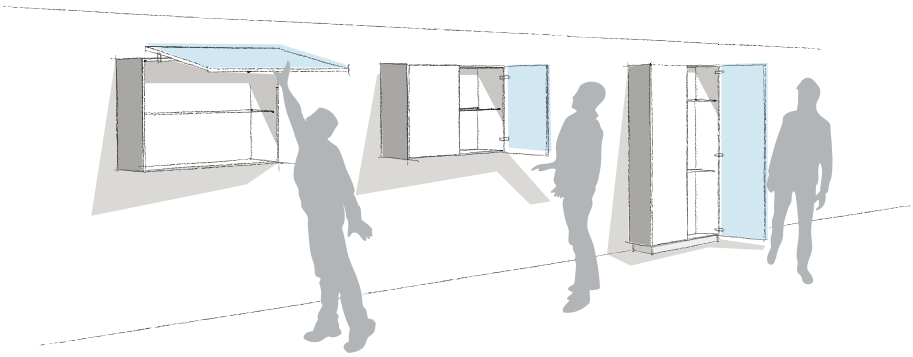
Everyone does it: Slide it. Love it.

People like to keep it simple. On their tablet PCs. On their smartphones. The revolutionary aesthetic appeal of virtual sliding fascinates millions: gentle, flowing movement, simply at the touch of a finger.

But sliding in the real world is captivating more and more people: cars that provide real practical value come with a sliding door; a sliding sunroof creates a sensation of openness and space, and at home there we are sliding panel curtains and doors, whether as room dividers or on furniture.

The trend towards sliding is also opening new doors for you: Hettich gives you sliding door systems that go perfectly with your furniture ideas. For bedroom, living room, office and kitchen furniture.

Are you open to a new love? Welcome to Hettich.



Ergonomics

Always in reach. Never in the way.

In terms of ergonomics and convenience, sliding doors are a cut above any other door system. That's clear to see in everyday use: open sliding doors don't get in the way where space is at a premium. Open doors on wall units are not likely to leave you injured. Sliding doors are also easy to open without stretching or dodging out the way.

Design

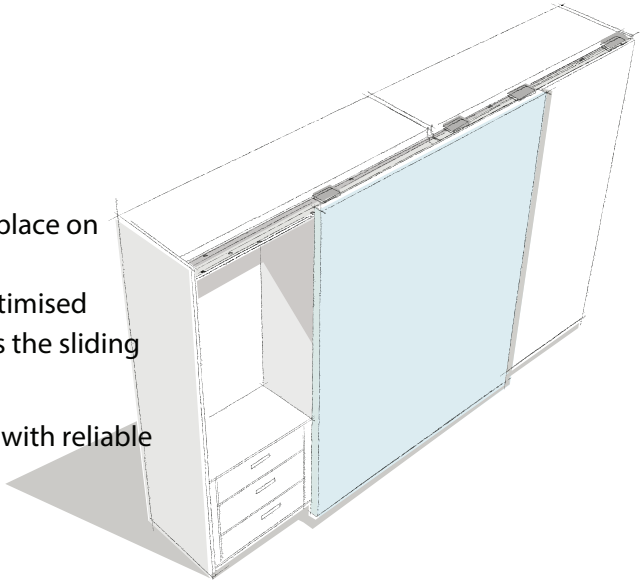
Unadulterated form. Distinctive surfaces.

Sliding doors provide the key to picking up on modern, spacious interior design and cleverly carry it through in furniture. Because large surface doors, particularly with flush fitted sliding door systems, are the ideal creative element for purist interior design.

Hettich sliding door systems impress with narrow reveals that hardly detract from the homogeneous look of furniture fronts. Only a few reveals are visible on large format fronts anyway; elegant fascias reduce the number of reveals to a minimum.

Easy precision adjustment provides superb finished results with perfect gap alignment.

Functionality



Easy to begin with. Then quiet.

Sliding doors are particularly good at meeting the demands users place on cabinet doors today: they are easy to open and close.
The ergonomic benefit of linear door movement (see page 3) is optimised further still by low opening forces. Convenient Silent System closes the sliding door quietly and gently.

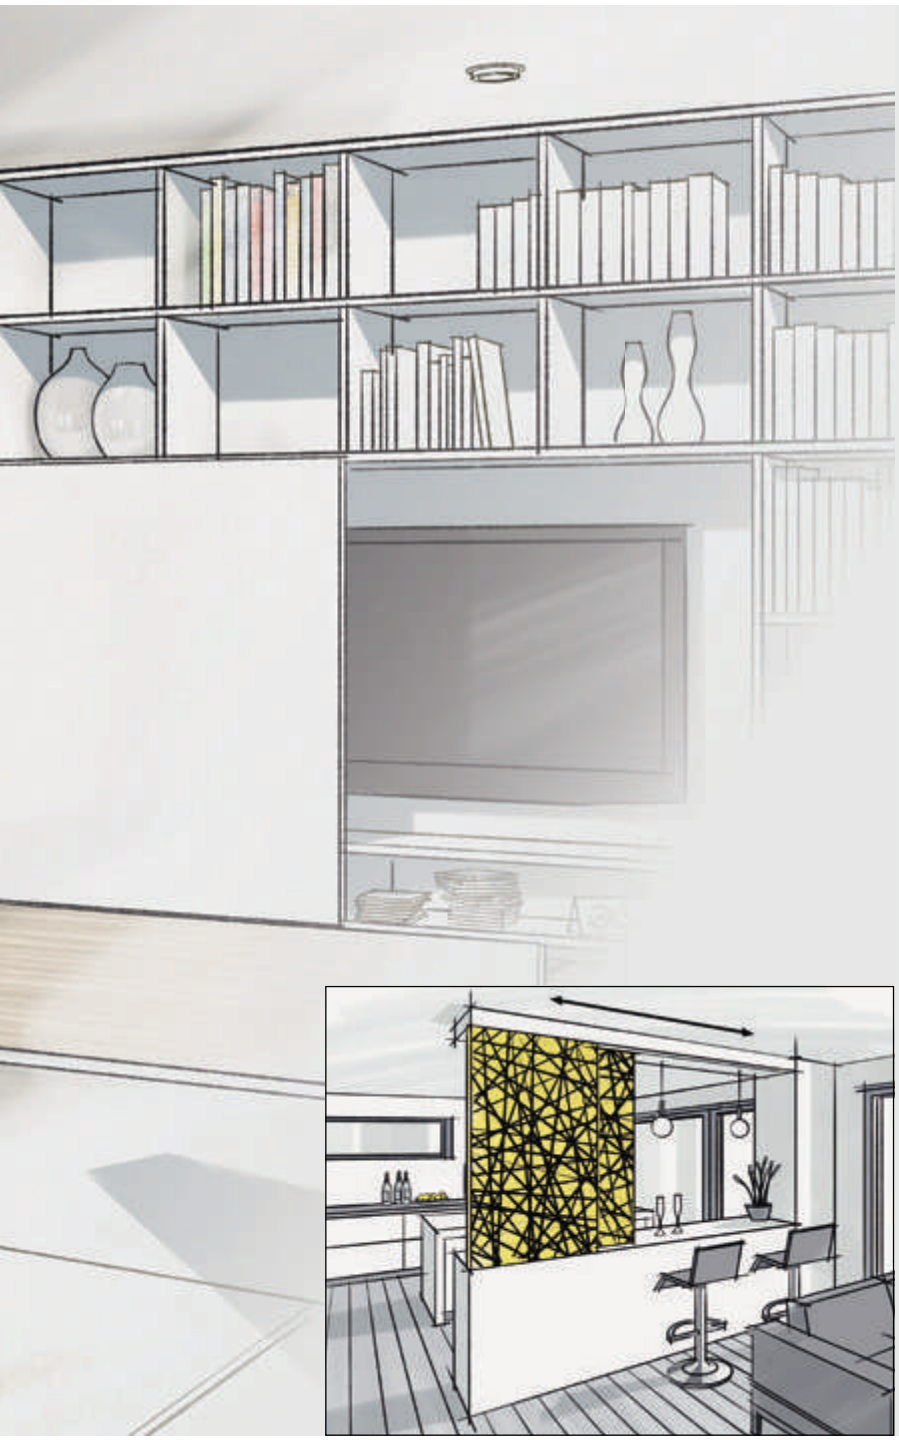
Altogether, Hettich sliding door systems leave no margin of doubt with reliable quality, superb smooth gliding action and long life.

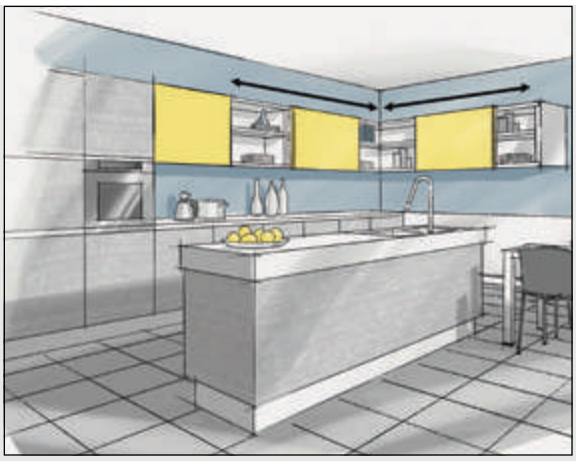
One system, many applications: SlideLine M

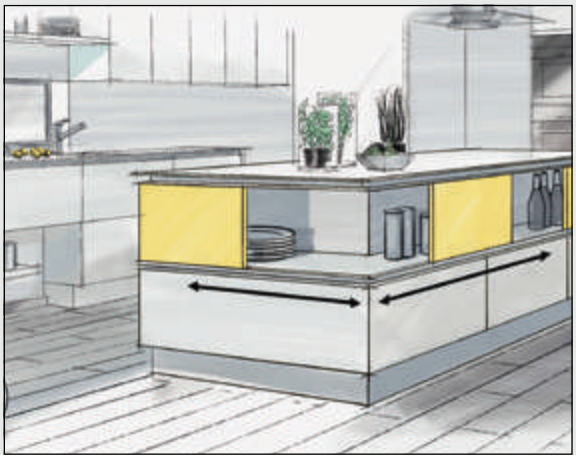
Scope for new ideas: SlideLine M

It's your ideas that decide

SlideLine M turns simple shelf units into attractive pieces of practical furniture with a look that can be varied all the time: moving the doors to different positions creates ever changing constellations of open and closed elements. This gets things moving in furniture design. And never fails to please. It's your ideas that decide. Discover the wealth of applications for SlideLine M.





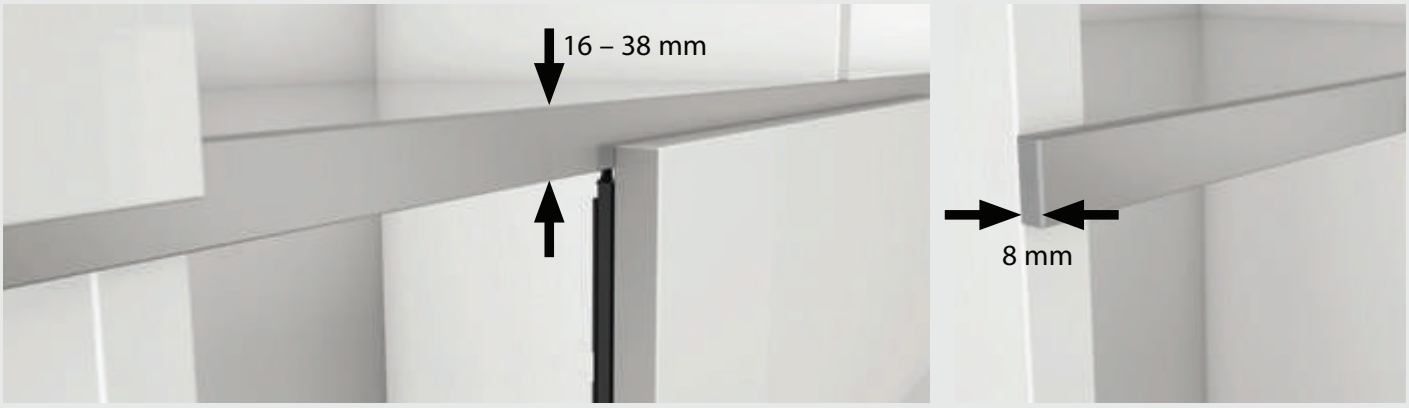


High creative flexibility from different door materials

SlideLine M gives you all the options in designing your furniture – can be used for wooden, aluminium framed or glass doors weighing up to 30 kg.

Easy installation on the assembled carcase

The SlideLine M system uses runner profiles that are quick and easy to install – as they simply screw into place. Cleverly designed mounting accessories means it only takes one-per son to install the system. As all installation steps are carried out from the front and not from the side, SlideLine M can be used for creating wall to wall units without a problem.



Neat look.

Discreetly vanishing into the baєk ground, SlideLine M's working compo nents don't intrude on the design of furniture. With the profile projecting by a mere 8 mm, sliding doors can be mounted for a particularly close hug ging fit. Two doors can cross each other in just one profile.

Different shelf thicknesses?
Not a problem: different profile sets in profile heights of 16 – 38 mm provide perfect positive locking solutions. And the silver or black decorative profile blends elegantly into the design of furniture.

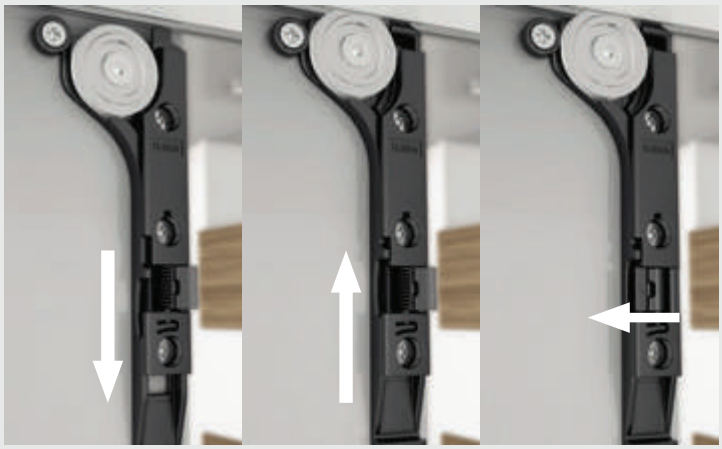
First-class soft closing action:
Silent System

Perfectly soft stopped sliding doors underscore the quality of furniture. Silent System is unobtrusively integrated in SlideLine M's runner component and closes doors gently and quietly.

And where several sliding doors run side by side in one profile, Silent System in colliding direction can slow them down as they move towards each other.

Even gaps, perfect design.

Sliding doors can be perfectly aligned with the integrated height adjuster (+/- 2 mm).



Tool-less fast installation

Save time and effort: the SlideLine M system makes easy, fast work of installing sliding doors. After pulling the guide component down by means of a spring mechanism, it can be inserted and engaged in the top profile without the need for tools. Runner and guide components simply screw into place – no special work needs to be carried out on the fronts.

AvanTech YOU drawer system

Hettich

THE KITCHEN STUDIO

Why AvanTech YOU ?

Easy to install and with options to retrofit into existing spaces, AvanTech YOU also has the biggest scope for customised design.

Slim design: a sleek 13 mm drawer side profile and more accessories for customisation.

Optimised drawer performance:one drawer, two runners. Interchangeable due to compatible drilling patterns and with Hettich's unmatched Push to Open and Silent System close technology.

Efficient and cost effective production: production and assembly processes guarantee cost effectiveness and efficient work flows while at the same time providing the basis for a broad product lineup.

KEY FEATURES

Design diversity and creative flexibility:
different shapes, colours and materials for design continuity inside and out.

Many options for customisation: additional design profiles and DesignCapes.

Function and form:
looks good, performs too. High quality runners and strong underlying technology for a robust and durable draw.

AvanTech YOU is a “double walled” drawer system

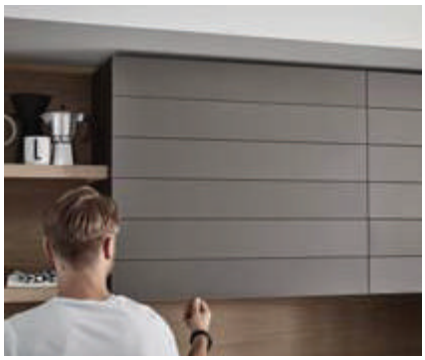
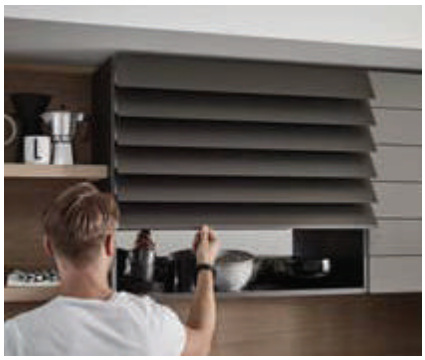
REHAU

FLIPDOOR

The Art of Storage

THE KITCHEN STUDIO





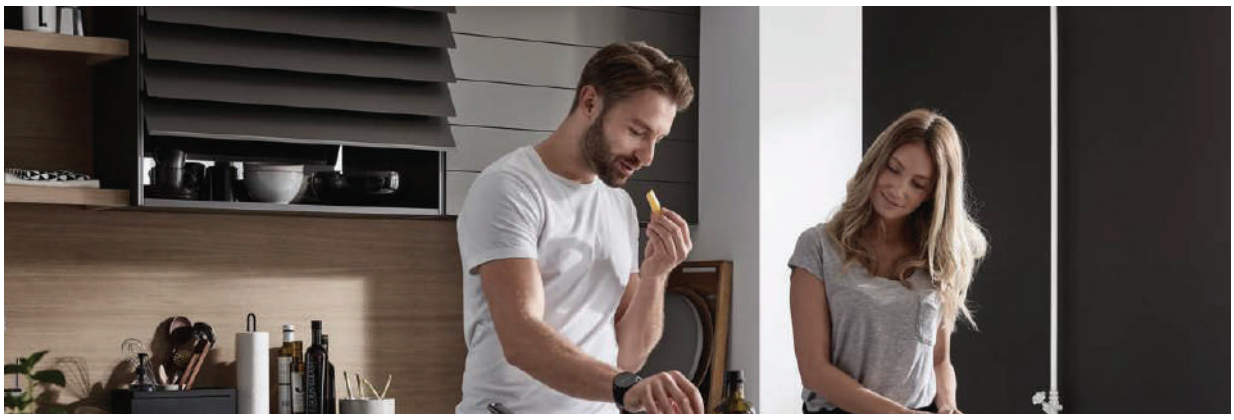
When you approach storage space as design in its own right, and go beyond mere functionality and conventional ideas, a simple overhead kitchen cabinet can be transformed into something completely new – FLIPDOOR, or, as we like to call it, The Art of Storage.

The straight lines of its silhouette – with no visible track system – make a great first impression, but open FLIPDOOR cupboards are real lookers too. FLIPDOOR also offers outstanding practicality on every level, from its super-smooth scissor movement to the space-saving opening mechanism. It is even delivered pre-assembled and ready to fit.

Manufactured from durable, low-maintenance RAUVISIO crystal, FLIPDOOR blends seamlessly with other furniture made using REHAU surfaces.

R 30 000

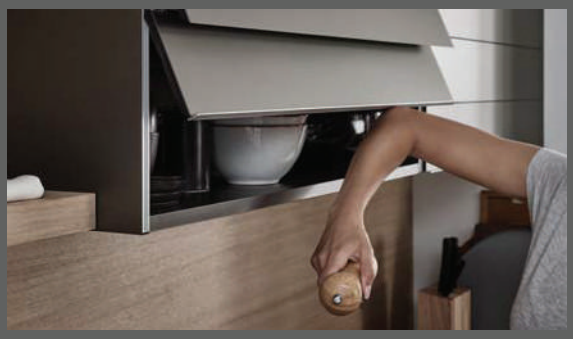
900 x 780 x 350 inc.Vat



KEY FEATURES

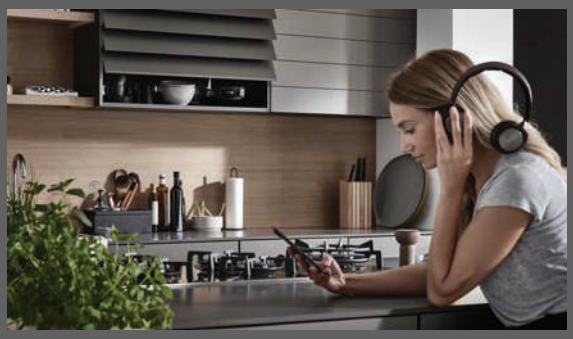
FLIPDOOR is made using our exclusive RAUVISIO crystal glass laminate.
The material brings a whole range of advantages – and not just when compared to real glass.

Easy to handle

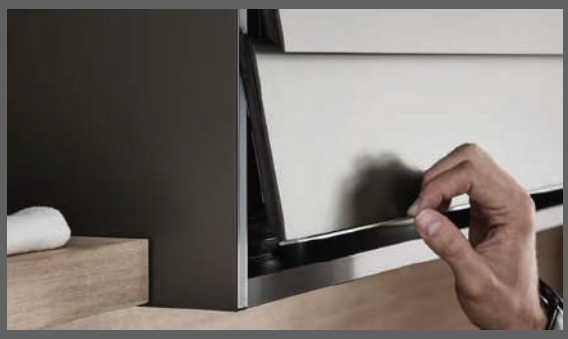


Efficient use of space – and stylish too

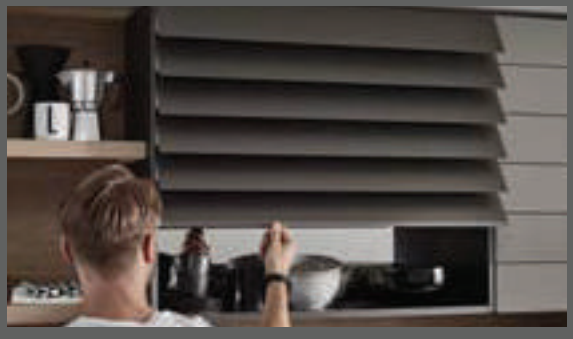
Perfect match with REHAU black gloss (Piano) crystal

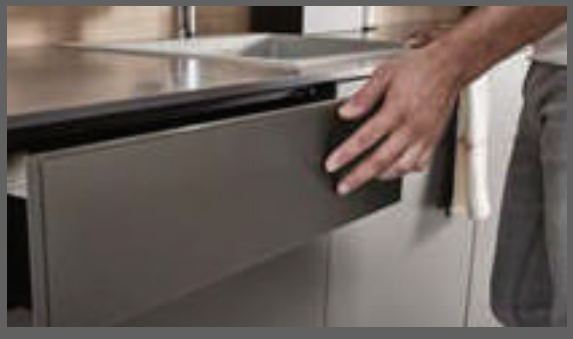


Satisfying closing sound



No visible edges





REHAU

CRYSTAL LINE

THE KITCHEN STUDIO

Ample storage space.
High quality, modern look.
RAUVOLET crystal-line gives you all this and more.
It combines the advantages of glass plus those of polymers
and is therefore more break-resistant and lighter than glass.
All whilst featuring a refined design and appearance.

R 10 846 each

900 x 1500 x 16mm inc.Vat

A solution to suit every taste: RAUVOLET crystal-line frames the uniform finish of the front panel with a sophisticated metallic-look track system. RAUVOLET crystal-line complete uses RAUVISIO crystal throughout, including the track system and pelmets – avoiding any unwanted colour or material changes. An impressive combination that offers the perfect solution for every project.

Needs to be a specific colour? Rauvolet crystal-line offers the ideal solution. With the vario option we can create a customised colour match for you, even for small order quantities – for surfaces and tambour doors.

Product advantages

Appearance, quality, convenience – RAUVOLET crystal-line combines all of these in one.
The 50mm slats create a harmonious, flat front panel that offers outstanding scratch resistance and strength for everyday use. It also impresses with fantastic running properties, ensuring it is easy to use. The perfect total package.

Design match

A seamless kitchen front – the result of REHAU's sophisticated and integrated approach to design. Kitchen fronts, edgebands and tambour doors can be perfectly combined regardless of whether they are matt or high gloss. This coordinated design concept provides you with added freedom when planning a project, not just in the kitchen, but in all areas of interior design.
